

# CLEAR QAM

## 1 Connect coaxial cable from your cable source to the ATSC / digital port on the QAM tuner

- For more information, see the SnapStream HDTV Setup Center. 

## 2 Choose and install an QAM / digital TV tuner

### Choosing a card:

- For a complete list of supported TV tuner cards, see the Beyond TV system requirements. 

### Installing a card:

- Follow the TV tuner manufacturer's directions for installing the TV tuner.
- In a typical installation, first install the TV tuner's drivers, and then install the TV tuner itself.
- Test whether the TV tuner is working by running the bundled software (that came with the TV tuner).

## 3 Install and configure Beyond TV

- Install Beyond TV.
- Run the Beyond TV Setup Wizard. The setup wizard covers all setup options, including TV listings and SnapStream.Net account setup.

Beyond TV's Setup Wizard

**Note: A SnapStream.Net account is required to schedule recordings from any web browser or WAP-enabled cell phone.**

- See complete documentation of the Beyond TV Setup wizard in the Beyond TV help file. 

**Enjoy watching and recording TV with Beyond TV!**
